

In re Charpentier et al.
Filed: November 9, 2000
Page 2 of 14

In the Specification:

Please replace the paragraph beginning at page 10, line 16 with the following paragraph, which includes markings showing the changes made with respect to the replaced paragraph:

Additionally, the invention may accommodate catalyzed reactions such as those employing, without limitation, transition metal catalysts including, for example, iron, nickel, and palladium. If desired, these catalysts can be used in combination with ligands such as monodentate, bidentate, or tridentate ligands, the selection of which is known in the art. Examples of such ligands can be found in U.S. Patent No. 6,176,895, which was Serial No. 09/185,891 filed November 4, 1998 and issued January 23, 2001, the disclosure of which is incorporated herein by reference in its entirety.
